26 March, Barcelona

Background information on the signature of a multimillion contract for the global logistics of ITER components between F4E and DAHER

What is the scope of the contract?

Fusion for Energy has signed a contract for the global logistics of all European components to the ITER, Cadarache. Through this contract, it is also envisaged that Fusion for Energy will pay for the delivery of the components manufactured by the other ITER parties, from Marseille's Marignane airport or Fos-sur-Mer, its sea port, to Cadarache, where they will be finally assembled.

What is the duration of the contract?

The planned duration of the contract is for at least two years.

What is the value of the contract?

The overall value of the contract is in the range of 100 million EUR.

To whom is the contract awarded?

The contract is awarded to DAHER.

DAHER is an equipment manufacturer that develops integrated industrial systems for aerospace and advanced technologies. By linking its know-how in industrial manufacturing, product and process engineering, logistics and transport, and industrial services, DAHER designs and develops value-added solutions for its industrial partners, who benefit from this convergence of industry and services. The company has established itself as a leader in five fields of activity: aircraft manufacturer, aero structures and systems, integrated logistics, nuclear services, and valves.

It boasts a turnover of nearly one billion EUR, and its order book stands at around three and a half years of turnover. Driven by bold innovation ever since it was founded in 1863, DAHER has established itself today as one of the major players of the third industrial revolution.
